SS-165PA NFC Programming & DALI-2 & D4i Control Power

SOSEN
LED DRIVER

LED DRIVER

PA Series

Features:

- Efficiency up to 94%
- Output current can be adjusted through NFC programming
- DALI-2 & D4i certification
- Dim-to-off & Standby power≤0.5W
- Surge Protection: CM: 10kV, DM: 6kV
- AUX Power: 24V/125mA
- Low Inrush Current≤15A
- Built-in 16Vdc DALI-2 bus power supply
- Built-in AC power metering with up to ±1% accuracy
- AC Dimming/Timing/ELA/CLO/NTC
- Protections: SCP/OTP/OVP/OPP
- Suitable for Class I /II lamps
- IP20
- Installation dimensions conform to Zhaga standards
- Warranty: 8 years

Description:

SS-165PA-XXF is 165W NFC intelligent LED driver power supply, which adopts the standardized interface of D4i intelligent lighting system, which can realize interconnection with intelligent lighting system and fine control and management. Which can be compatible and connected with a variety of intelligent lighting systems and controllers. The product has a variety of intelligent functions, which can adjust the power, brightness, color temperature and color parameters of the lamp in real time, support intelligent lighting scene setting and adjustment, monitor the status and fault of the lamp, and carry out remote management and maintenance. In addition, it also has a full range of protection mechanism, extremely high power conversion efficiency and stable and reliable output performance, which can provide stable, safe and reliable power support for LED lamps.

Application:

Street lights, tunnel lights, sports lights.

Model List:

Model	AC Input Range	Max. Pout	Vout Range	Full Power Vo Range	Iout	THD(Typ.)	PF(Typ.)	Eff.(Typ.)	Max.Tc

Note:

1.Default Tested: at 230Vac, full load, Ta 25°C.

2.The performance of the LED Driver can be guaranteed within the full power Vo range.The voltage lower than full power Vo range, it is need to test the performance with the LED module;

3.Low inrush current due to istart, which enables a single MCB to control more LED drivers.

NOTE:

1. SOSEN warrants the LED Driver itself complies with EMC standard. However, LED Driver's EMC should be re-checked when integrated into lighting systems due to unexpected interference of components.
2. Please short (ACL and ACN), (V+ and V-), (Dim+ and Dim - and Vaux+ and Vaux- and STB) when Hi-pot test.

NTC Functions :

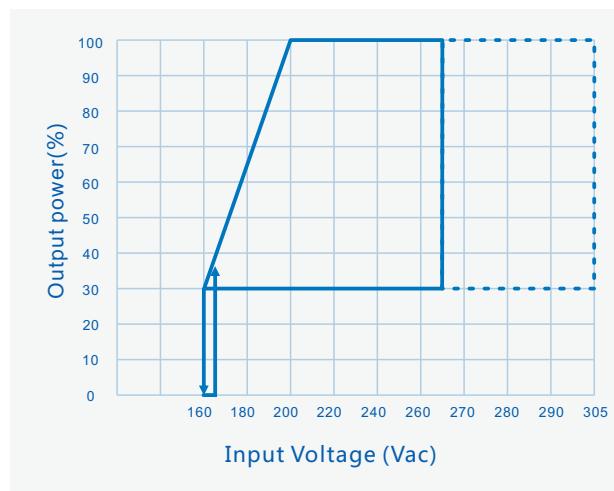

Parameter	Min.	Typ.	Max.	Remark
External Thermal Protection (NTC)	T1 (Start derating)		60°C	The default value can be set through software, When the temperature of the LED module is $\geq T1$, the output current gradually decreases
	T2 (Stop derating)		70°C	The default value can be set through software, when the temperature of the LED module is $\geq T2$, the output current remains unchanged
	T3 (off)		90°C	The default value can be set through software, When the temperature of the LED module is $\geq T3$, the power is turned off
	Protection Current Setting Range	0%Ioset	20%Ioset	100%Ioset Default setting is 20%

Note: The recommended NTC is 10K-3950B/3435B

AC Dimming :

The default range of AC Dim is 160-264Vac. The range can be adjusted via the programming interface. Also, the Start Input Voltage, Start Output Level, Stop Input Voltage and Stop Output Level can be set. There needs to be a minimum of 20V difference between Start and Stop Input Voltage settings when programming the driver.

There must be a minimum voltage difference of 5V from the Start Input Voltage before the driver starts dimming.

Notes:

1. In the solid line, the driver will operate normally.
2. In the dashed line, the driver will operate safely but not fulfill requirements.

SS-165PA NFC Programming & DALI-2 & D4i Control Power

Timer Dimming :

Traditional Timer Dimming, Self-Adapt-Midnight Timer, Self-Adapt-Percentage Timer.

Time-controlled dimming settings can be made by setting 6 curves.

Traditional Timer Dimming: After the LED driver is powered on, it works according to the set dimming curve (adding a gradient time can slowly change between different dimming levels to prevent sudden changes in brightness and cause glare).

Self-Adapt-Midnight Timer: The 4th segment of the adaptive midnight timer curve acts as the midnight point. The LED driver automatically saves the effective power-on time and automatically calculates the adaptive cycle time through the effective calculation time of 4 times.

Self-Adapt-Percentage Timer: The adaptive percentage runs according to the automatically calculated adaptive cycle time according to the initially set dimming curve.

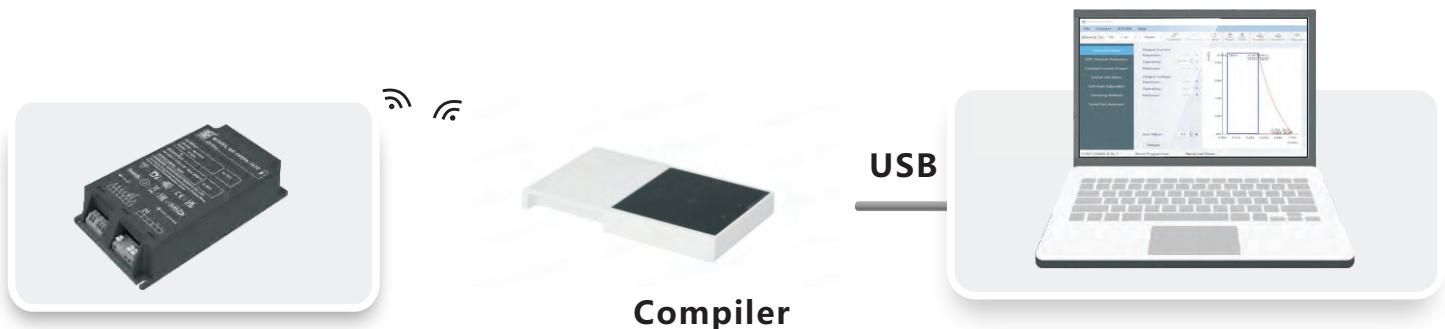

Constant Lumen Output :

Light decay compensation function, according to the LED lamp light decay curve, in the life cycle of the lamp, by gradually increasing the output current, to achieve a constant output of LED luminous flux, the overall luminous effect remains unchanged.

End Life Alarm :

By presetting an LED driver life time, such as 50KH life, when the luminaire use time accumulates more than 50KH, the lamp will flash 5 times every time the lamp is turned on, reminding the user to replace the LED driver.

Package

- Outside carton dimension: L×W×H =445mm×225mm×145mm;
- 12PCS/Carton;
- Net weight/Piece: 0.835kg;Gross weight/Carton: 11.5kg;
- Please refer to the product name, model number, manufacturer identification, QC PASS, manufacturing date on the package.

Transportation

Packaging is designed suitable for transportation by trucks, vessels and flights. The products should be avoided direct sunlight and rain, loaded/unloaded with caution.

Storage

The product storage meets the standard of the GB 3873 - 83.

Products should be rechecked if stored for over 1 year before assembly.

RoHS

Products comply with RoHS Directive (2011/65/EU) and amendment 2015/863/EU.
